

A Letter From Invest4land CEO Alper Apaydın

Dear Valuable Investor of Invest4land,

It is not possible to achieve great things without team work and dedication. So a big thanks to all our investors, our partners and to all Invest4land team!

Our team in Manisa has been working very hard, whether it's hot, rainy or under the snow to create the most beautiful and productive walnut farms.

2018 was a great year for us. We are very happy to see the success of the development. We increased the size of nurseries due to our ground-breaking **Paradox Walnut Seedlings**.

We have planted thousands of walnut trees first few months of the year and same process has started again towards to end of the year. We will be using the high planting method in some of our projects where the elevation is suitable.

We had a great harvesting period in our mature farms. Harvest period is the most exciting and rewarding times of our business and we are very excited for the 2019 harvest season. We have reached to **12.000 daily free-range eggs** capacity for our secondary income generation model. Beautiful natural stone houses in our projects has been constructed for your pleasure.

Many of you got your title deeds already. We are proud to re-announce our asset holding companies still are free from any bank loans or debts.

We have participated in Agri-Technica Expo in Hannover which is the largest exhibition in the world for agricultural machinery and innovation. We have visited INRA agricultural research institution in France and created a great relationship to exchange our research and test results in our farms. We have made a partnership with the top laboratories in Europe to compare our research result. And we have developed our techniques to develop paradox rootstocks in our nurseries.

An interactive map was published in our website so our investors can log in and see the latest photos and videos of their projects. Many educational videos has been made for our projects, areas, stone houses etc.. One of the most rewarding news was receiving the final permissions for our **Walnut Facility Factory** in Manisa. This facility will be one of the most integrated and largest one in Turkey and Europe. We have ordered the machineries and construction will start in the 1st quarter of 2019.

We are so excited for 2019. Our Free-Range Eggs, Walnut and Olive Oil brands will be released in the top quality shops in Turkey and abroad. By selling the product directly to retail, we will achieve the highest possible returns for our investors. New Agroforestry farms with livestock farming and with new lavender plantations are being developed.

You can be proud to be a part of Invest4land family by investing not only a great future with high returns but also contributing to the mother nature.

Please keep following us in the social media to see our latest news, developments and videos. We wish 2019 to be very successful and happy year for all of us.

Regards,
ALPER APAYDIN
